Job Application for Android/Linux Software Engineer

Dear Mr./Ms.

About Me

I am Jing in early 30s. Before I came to Auckland, I have worked as a Android software engineer for more than 5 years in Beijing, China. With the pursuit of clean water, blue sky and freedom air, I came here. I hold a work visa (Silver Fern Visa specifically) and I would like to continue working as a software engineer within Android or Linux domain.

Why Me?

I have more than 5 years working exprience in world top class corperations, and I have deep knowledge with dominant android smart phone platforms from Qualcomm and Mediatek. I view myself as a full-stack android developer, having been working in android OS system team, I handed on with bootloader, linux kernel, bionic libary, zygote and up to framework and app layer. I can alsowork in bare-board ARM register level with the exprience in porting ucOS. I can manage my times well and am a good team player. I am ready for any chanllenges in the future.

Sincerely,

Jing Zhang
